

# Italian numbers format

## Every number

Decimals separator: **comma**

Thousands separator: **dot**

## Examples

$\pi = 3,14$	right
$\pi = 3.14$	wrong

2.145.725,05	right
2,145,725.05	wrong
2145725.05	wrong

## Currency

Currency symbol: €

Currency decimals: 2

€ 15,07	right
€ 15.07	wrong

€ 1.745,16	right
€ 1,745.16	wrong
€ 1,745.2	wrong
€ 1,745.162	wrong

# Italian dates format

The right format is **dd/mm/yyyy**

dd → 2 digits for the day

mm → 2 digits for the month

yyyy → 4 digits for the year

Is it also possible to use minus instead of slash (dd-mm-yyyy)

## Examples (Easter 2020)

12/04/2020	right
12-04-2020	right
12/4/2020	wrong
2020/04/12	wrong
04-12-2020	wrong

## Ordering the dates

When ordering the date in Italian format, the **alphabetical order does not work**

## Example

### *Right order (by date)*

31/01/2020	31 January
07/05/2020	7 May
25/12/2020	25 December

### *Wrong order (alphabetical)*

07/05/2020	7 May
25/12/2020	25 December
31/01/2020	31 January
